Finish off for the Barrette

I have found using a mason jar or small sized peanut butter jar is great to get a slight curve to the piece for the finish off. Apply 2 coats of Future Floor Wax -the kind for Long Lasting Shine Tough Acrylic Protection.
 ~Besure before starting this process you use some wax paper under the piece.

Then using a piece of deer skin or slightly thicker piece of leather helps keep the strength for the barrette.

~You can either sew the piece to the leather or use a good glue to attach with.

Then just attach to the Barrette finding and your are set to wear the piece.
