

HOW TO ATTACH POP CLASPS

Step 1:

Cut 3mm cording to your desired length.

Step 2:

Dispense an equal amount from each part of the epoxy.

Mix well.

Step 3:

Dip one end of the cording into the epoxy, gathering a light coating.

Step 4:

Insert the end into one half of the pop clasp.

Repeat on the other end of the cord with the other half of the clasp.

Allow the epoxy to cure overnight.

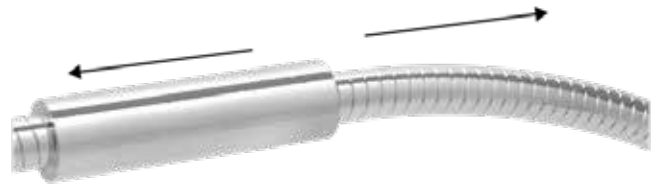

HOW TO OPEN AND CLOSE POP CLASPS

OPEN

Step 1:

Grasp the cord or chain firmly between thumb and index finger on both sides of the clasp.

Step 2:

Smoothly pull both sides of cord or chain equally until clasp 'pops' apart.

CLOSE

Step 1:

Grasp the cord or chain firmly between thumb and index finger on both sides of the clasp.

Step 2:

Firmly push the ball end into the cylinder until clasp 'pops' in place.

Note: The closed pop clasp will look like a smooth cylinder.
